

FOR IMMEDIATE RELEASE

QuickGPT Launches on AppSumo with an Exclusive Founders Deal — Lifetime Access for \$59, Limited to the First 5,000 Users

QuickGPT brings its full multi-model AI platform to the AppSumo marketplace with a lifetime founders deal — backed by AppSumo's 60-day, 100% money-back guarantee.

WINCHENDON, MA — QuickGPT.ai, a credit-based multi-model AI platform, today announced its full integration and launch on AppSumo, the leading marketplace for software deals used by entrepreneurs, freelancers, and small businesses worldwide. To mark the occasion, QuickGPT is introducing a limited Founders Deal: full access to the QuickGPT platform for a single lifetime payment of \$49, available exclusively to the first 5,000 users.

What's Included in the Founders Deal

Founders Deal members get the complete QuickGPT experience, including:

- Full access to every feature in the QuickGPT software
- 50 free credits every single month, for life
- All future feature releases and platform upgrades at no additional cost, for life
- A single one-time payment of \$49 — no subscriptions, no recurring fees, ever

The deal is capped at the first 5,000 users, after which it will close permanently. Every purchase is backed by AppSumo's 60-day trial and 100% money-back guarantee — customers can try QuickGPT risk-free, and if it isn't the right fit, AppSumo will refund the purchase in full.

Global Access Through EZPin

AppSumo's community spans the globe, and QuickGPT is built to meet it there. Through QuickGPT's distribution agreement with EZPin, customers in more than 120 countries will be able to purchase QuickGPT gift card credits directly through EZPin's retail and digital network — giving AppSumo's international users a simple, local way to top up and keep using QuickGPT, no matter where they're located.

Why We're Launching on AppSumo

QuickGPT was built on a simple idea: access to powerful AI shouldn't require juggling multiple subscriptions or paying for tools you don't fully use. AppSumo has built its entire community around that same philosophy — connecting builders with tools that deliver real, lasting value at a fair price. Launching the Founders Deal on AppSumo lets QuickGPT put that philosophy into practice from day one, rewarding an early group of users with lifetime pricing that will never be offered again once the 5,000 spots are gone.

"AppSumo's community is exactly who QuickGPT was built for — people who want serious tools without the subscription treadmill," said Osvaldo "Oz" Rodriguez, Founder, President & CEO of UpPluck Social

LLC, the parent company behind QuickGPT. "This Founders Deal is our way of saying thank you to the early believers who help us build something bigger."

Looking Ahead: KiddosGPT.com

QuickGPT's momentum doesn't stop here. In the coming months, the company will debut KiddosGPT.com, a new platform purpose-built for children ages 6 to 12. KiddosGPT will build directly on the kid-friendly, parent-controlled dashboard already available inside QuickGPT today, extending it into a standalone experience designed from the ground up for young learners — giving parents the same oversight and peace of mind, with an experience tailored specifically to how kids explore, learn, and create.

About QuickGPT

QuickGPT.ai is a credit-based, multi-model AI platform that gives users flexible, prepaid access to leading AI models without a subscription. QuickGPT currently supports 21 native languages, with coverage across more than 90 countries and more than 9,000 workflow integrations. QuickGPT is a division of UpPluck Social LLC, a Massachusetts-based business solutions company.
